U5T15: Template Controller

in list <u>Done</u>

MEMBERS   **STORY POINTS**

3

Description <u>Edit</u>

Create a controller which takes in the file input from the website and passes it to the necessary wrappers to add the given template to the database.

Dependencies

<u>Hide completed items</u>   <u>Delete.</u>

100% |_____|

- [x] ~~Y9X5:>WiixEhetxiv[vettiv~~

Sample complex queries

Filter for all the rows whose postal code starts with `M1C` and born in the year `1996`, `1997`, `1998`, `1999`, or `2000`.

```
{
  "$and": [
    {
      "$like": ["$postalTxt$", "M1C.*"]
    },
    {
      "$like": ["$clientBirthDt$", "(1996|1997|1998|1999|2000)-.*"]
    }
  ],
}
```

Filter for all the rows who are in Toronto and speak english but did not provide phone number

```
{
  "$and": [
    {
      "$and": [
        {
          "$eq": ["$cityTxt$", "Toronto"]
        },
        {
          "$eq": ["$officialLanguageId$", "English"]
        }
      ],
    },
    {
      "$not": [
        { "$like": ["$phoneNo$", ".{3,}"] }
      ]
    }
  ]
}
```

Omar Chehab Nov 4 at 7:53 PM

> Instead of creating a fragment, the `read-list.html` template **@daydereid** created is reusable in it of itself, I added a variable title and re-used the template successfully with **@jacobmcmorrow**'s Client Profile entity.

- Edit - Delete

Omar Chehab Nov 2 at 7:59 PM

Since 📘 U6T26: Entity Table Fragment was not made into a fragment, we should turn it into a fragment in this task and use the fragment in the nars template page
